
Looking for a cheap fix in the slow month of January? Gamers should always be on the lookout for games that have the most “bang for your gaming buck.” Ideally this means a game with a lot of content that has dropped in price.

{loadposition google}

Here are a few games to pick up on the cheap. Saints Row 2 is a great example for either the PS3 or 360. It's an open sandbox game that doesn’t take itself too seriously. Saints Row 2 has a captivating single player game with enough added content to take up at least 40 hours of gaming time. The endless customizations of characters, your crew, and the cars just adds to the game.

What about Assassin's Creed: Brotherhood? Another favored game from last year that is now $20 or less at most places. AC:B has a lengthy single player game with lots of content, and an interesting story. There is also a robust and active multiplayer as well as additional virtual missions. Gamers who are new to the series cannot go wrong with getting this game.
